

THIS IS JIM

F2E DESIGNER

I was made by my lovely mom, and was born and raised in Taiwan. I'm not just a designer, but nor am I just a programmer either. I like to try new things, celebrate difference, and make things look attractive. I attempt to create epic work, but at the same time also recognise that I am powerless on my own. I like to be part of a great team, and relish the opportunity to build things together.

THE FRONT-END DESIGNER AT UKEAS SINCE 2016

Project owner and a bridge between the marketing and IT teams, collaborating with both.

THE UI/UX DESIGNER AT AI GROUP FROM 2013 TO 2015

Developed MOT and AI Group's enterprise information portal site. This included a storage system, project management tool, as well as various management reports, charts, and much more.

THE FREELANCE ART DIRECTOR AT GOAWAY IN MY SPARE TIME

Designed a travel journal Android app. Took charge of the logotype, user interface, icons, visual identity, design guidelines, and all website design.

THE STUDENT AT TAMKANG UNIVERSITY FROM 2005 TO 2009

I received a Bachelor of Engineering in Electrical Engineering.
